

SKUDO ALL-TERRAIN MAT

Skudo All-Terrain Mat provides an extremely durable, safe, slip-proof surface ideal for use on uneven, gravel or muddy construction sites. Bright, thick All-Terrain Mat indicates a designated pathway for workers, contractors and visitors, protecting them from hazards.

Skudo All-Terrain Mat provides a heavy duty surface (10-12mm) with a free draining structure that allows dirt and water to pass through. This provides a very high level of slip resistance for both wet and dry conditions.

All-Terrain Mat offers excellent durability and resistance to heavy wear and tear.

PRODUCT DATA

Mat Width	1m
Mat Length	10m
Mat Weight	39kg per roll
Product SKU	SKUDOATM

USES

- Provides a safe walkway over gravel, rocks, mud, snow, sand and ice
- Excellent walk off mat to keep your site and job trailers clean
- Direct traffic safely through heavy construction zones
- Anti-fatigue properties for workers
- Resistance to mould and fungal attack
- Fire retardant
- Frozen resistant

FEATURES

- Extremely durable construction that allows water and soil to pass through the mat
- Thick and heavy so it stays in place in challenging conditions
- Can be pegged down as needed
- Self-cleans with rain or hosing allowing debris to pass through

For jobsites with rough terrain, heavy rain, mud, sand, snow and ice. The Skudo All-Terrain Mat is the solution.
